-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, 3, 4, and 5, are rejected under 35 U.S.C. 102(e) as being anticipated by Engelaere (U.S. 6,511,723).

See col. 1, lines 15-18 and col. 5, lines 1-20 for the teaching of a co-extruded layer with a filler of talc at 5% in a polyethylene film to increase tear ability.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1772

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 4, 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Engelaere (U.S. 6,511,723) in view of Dipoto (U.s. 5,558,930).

In the event the 5 to 30% range of talc given above is not taken as an anticipation it would have been obvious to practice the invention of the reference at the 5 percent endpoint in view of the teaching of the range. The reference discloses the tear layer as the outer layer of a three-layer laminate that is co-extruded. The instant invention claims it as part of a two-layer laminate and a three-layer laminate being the central layer of the three. DiPoto teaches two and three layer films with properties of the middle and outer layers being modified to affect tear resistance (col. 4, lines 15-30). It would have been obvious to have added talc to any layer of any two or three layer extruded polyethylene packaging film such as DiPoto where a difference in tear resistance is desired.
